

WELCOME BACK & HERE'S WHAT'S NEW

Wear a mask to the office and keep it on through our common areas.

You will be screened over the phone and again at your appointment to make sure there are no changes. We will also take your temperature. This is to ensure that we only see healthy and asymptomatic patients.

Hand sanitation is required upon check in and at the end of your appointment.

Physical distancing is required. Only those with appointments should be in the office. Exceptions are for those who need to be accompanied, or when assistance is needed.

Before your treatment, you will rinse with an antimicrobial mouthwash. This is necessary to reduce microbes in the oral cavity and in aerosols.

For payment, TAP is preferred. Where a PIN is required, the pad will be sanitized before and after each use.

ADDITIONAL SAFETY PROTOCOLS IN PLACE

1. In addition to our meticulous sanitation and sterilization protocols, we have implemented frequent wipe downs of all contact surfaces.
2. Plexiglass barriers at the reception areas for safer interaction. Air purifiers, and additional hand sanitation stations.
3. Additional PPE for staff with N95s, face shields and gowns depending on the procedures.
4. Reduction of Aerosol Generating Procedures where possible.
5. We have implemented extensive use of digital documentation and signatures.
